INTRODUCTION

Zoudiland project

01

MISSION

To create low cost, easy to use, and widely available platforms, services and dApp that people can really use.

02

VISION

To be a thriving ecosystem, which helps bring attention to the crypto space and eventually becomes a household name

03

THE PROBLEMS WE AIM TO SOLVE

Cryptocurrency is still inaccessible to many people in the world. It isn't obvious to people how to get started with it, such as interacting with and using blockchain infrastructure. It means a lot of people are gated away from some amazing benefits that they bring. In most cases it is still very complex to use, so even with decent understanding of how things work it requires users to jump through a lot of unnecessary, and sometimes daunting, hoops. There is a lack of growth campaigns, resulting in a large proportion of people that are not even aware these things exist. Since people fear what they don't know, it can reinforce a culture that prevents us from progressing to bigger and better solutions

WE ARE

Green energy is becoming a priority for more and more consumers, individuals and businesses, reflecting the ever-increasing need in the world's consciousness to feed low-cost, environmentally friendly economic growth.

01.Abstract

Zoudiland . Our dream

Zoudiland was born september 1st 2021 with the goal of being a decentralized meme & green energy project with a purpose. Zoudiland is a fun meme with a serious mission to rescue animals in need, bring crypto adoption to the main stream with new concepts such as rewards, NFTS, decentralized exchanges, and credit card for crypto payment on our website.

Zoudiland NFTs

Our largest project in the works is our NFT marketplace. We will allow users to create and buy/auction their own NFTs and plan to allow users to donate a 10% to helping save animals.

02 Value

TRUST

In cryptocurrency market trust is paramount. That means full Transparency not only in the community and development but Also in security eorts. Zoudiland has been audited by a third party dessert finance and has burned and locked majority of the LP tokens...

Zoudiland is in for the long haul. The decentralized community is Fostering and adopting long term development of the ecosystem and foundation in eforts to drive real use cases....

03 Zoudiland

Binance Smart Chain (BSC) was developed as a means of utilizing solidity-based smart contracts with much greater speed and eficiency than other, competing chains. With decentralized exchanges on BSC ofering lightning-fast swaps and extremely low fees, BSC has started to become one of the most widely used blockchains for Decentralized Finance (Defi). BSC uses a token protocol developed by the BinanceTeam called BEP-20. Known for 5 second block speeds much faster than doge with 1 minute block speeds. These 2 articles compare block speed:

Advantages of the Binance smart chain are: It's a proprietary blockchain, which will provide security and safety to all users and developers. Its native dual chain interoperability will allow cross-chain communication and scaling of high-performance dApps that require a fast and smooth user experience. It's EVM-compatible and will support all of the existing Ethereum toolings along with faster and cheaper transactions. Its on-chain governance with Proof of Staked Authority consensus, built on 21 validators who validate the transactions, will provide decentralization and enable significant community involvement.

Zoudiland is not responsible for the actions of the Binance smart chain network

04 Ecosystem

Community-Power

- Zoudiland is decentralized and
- owned by its fun, vibrant community.
- We welcome and embrace diverse
- perspectives to build Zoudiland into
- the best community in crypto. With a
- do-good mission of helping save
- animals in need.

Instand Rewards

- For every transaction in the Zoudiland network a 2% fee is
- distributed to existing holders. That
- means you earn more Zoudiland
- just by holding it in your wallet.
- Watch your Zoudiland grow every
- transaction!

Locked LP
 Initial Liquidity tokens are burned and locked. Additionally, 5%
of all transaction fees
are added to liquidity.
Here you can view LP holders:
https://bscscan.com/token/tokenholderchart/0x6ff8197A65219
0cca8341F523E6ff7F9452039CE

05 Zoudiland protocol

2% fee = redistributed to all existing holders.

5% fee is split 50/50 half of which is sold by the
contract into BNB, while the other half of the
Zoudiland tokens are paired automatically
with the previously mentioned BNB and added
as a liquidity pair on Pancake Swap.

of the 5% redistributions are burned
with every transaction
